

Akiptan Eligibility Form

1. Does the loan activity primarily focus on production agriculture and is it legal?

As a general rule at this time, Akiptan only finances production related agriculture operations. This can include livestock production, crop growing, production ag transportation, value added operations, and more. Akiptan does not finance recreational agriculture activities. If you have any questions regarding the loan activity, please reach out to our staff and we will help clarify. Lastly, Akiptan is only allowed to finance legal activities.

2. Is the applicant an individual tribal member or majority tribal member owned business?

Akiptan does not finance tribes or tribal related enterprises, non members, or businesses that are not majority owned by tribal members.

3. Is there, or will there be, enough collateral to cover the loan at least 100%?

Per Akiptan's policies, we are unable to finance loans that are unsecured. There needs to be a 1:1 match on loan amount and collateral value.

4. Is there, or will there be, enough income to make the payments?

Akiptan provides loans, not grants, and there needs to be reasonable evidence and support to show that payments will be able to be made and that the loan funds will be paid back in full.

If you answered "yes" to all 4 of these questions, you are eligible to apply for a loan at Akiptan.
